

Introducing Bactol[®] Moisturiser

NEW

Bactol[®] Moisturiser has been designed to protect the skin. It is enriched with Vitamin E, pH balanced and lanolin free.

Bactol Moisturiser complements Whiteley Medical's range of hand hygiene products which includes hand washes, sanitisers and alcohol gels. It absorbs quickly and is suitable for use under gloves.

Healthcare workers are required to wash or sanitise their hands regularly, and sanitisers and soaps, which don't have emollients, can be very drying on the skin. Dry, cracked skin can create the risk of infection and increase the risk of transmission to others. The use of an oil-containing lotion or a barrier cream, three times a shift, can substantially protect the hands of vulnerable healthcare workers*.

- Softens and Conditions Skin
- pH Balanced
- Enriched with Vitamin E
- Lanolin Free
- Absorbs quickly
- Suitable for use under gloves
