

RESILIENCE

Solvent Acrylic Sealer

Insist on **Whiteley Industrial** when ordering your hard floor products

BENEFITS:

- Prevents staining and damage
- Enhances the appearance of natural stone and concrete surfaces
- Highly durable, long lasting seal
- Suitable for use on concrete, terrazzo, slate, granite and other stone surfaces.

RESILIENCE provides a highly durable, long lasting seal that enhances colours and the appearance of natural stone and concrete surfaces, whilst also preventing staining and damage to the substrate. **RESILIENCE** is a fast drying, non-yellowing, solvent based acrylic sealer that is suitable for use on internal and external surfaces.

RESILIENCE is suitable for use on concrete, terrazzo, slate, granite, marble and other stone surfaces. **RESILIENCE** provides a semi-permanent seal that eliminates the need for regular stripping cycles and lasts for 2-5 years dependent on environmental wear factors.

RESILIENCE also provides a stable base coat for Thermaglo Plus Sealer Finish where a buffable finish is required (for Ultra High Gloss).

Refer to label and technical bulletin for directions for use and application information.

Packsize: 2 x 10L
