## SPOT CLEANING

### Mr Nomarks Carpet Master

Mr Nomarks Carpet Master is a carpet spot cleaner which is ideal for cleaning spots, spills and ground-in dirt. It inhibits carpet re-soiling and is easy and safe to use.

### Mr Nomarks Fabric Master

Mr Nomarks Fabric Master is a fabric spot cleaner which is suitable for use as a 'general purpose' fabric spotting detergent. It inhibits fabric resoiling on your upholstery.

### Mr Nomarks Fabrisan

Mr Nomarks Fabrisan is a revolutionary carpet and upholstery deodouriser that contains Natural Australian Tea Tree Oil and will eliminate almost any odour. Mr Nomarks Fabrisan effectively removes mould, spores and eliminates urine odours.

### Fabrisolv

Fabrisolv is a synergised combination of D-Limonene solvent and a surfactant blend which combine together to penetrate, remove and suspend all types of spots and stains in carpets, such as paint, oil, grease, ink and lipstick. **WARNING:** Fabrisolv may cause adverse colour changes on some carpets. Always pre-test carpet before use.

## HOW TO SPOT CLEAN CARPETS & UPHOLSTERY

1. Remove excess soil or liquid.
2. Where possible try to identify the type of stain; look, feel and smell.
3. Always pre-test the spotter on the carpet or upholstery in a small inconspicuous area before using. This is to determine if the product is going to have any adverse effects on the material.
4. If identification of the stain cannot be made then try spotting products in the following order: Mr No Marks Carpet Master or Mr No Marks Fabric Master, Mr No Marks Fabrisan, Fabrisolv.
5. Apply spotter with a clean white cloth and gently dab the stain working from the outside towards the centre.
6. For deep stains apply spotter directly to the carpet. **DO NOT** soak the carpet.
7. Rinse the area with water (if possible) after the stain has been removed.
8. Repeat steps 6 and 7 for stubborn stains.
9. If appropriate restore the carpet pile to its original shape by combing the carpet.

## HELPFUL HINTS:

### Prespraying:

Pre-spraying a detergent and extracting with water is a superior method to direct injection (diluting detergent in tank). Pre-spraying gives the detergent more time to penetrate carpet soils and hence offers better results. Fabripowr and Fabripowr Plus may be used as a carpet prespotter, prespray carpet extraction detergent, carpet sanitiser, odour suppressor and deodouriser.

### Permanent Stains:

Apply Fabrisolv undiluted to the spot. Using a small soft brush or cloth lightly scrub the spot starting from the outside of the spot and working towards the centre. Absorb as much Fabrisolv as possible from the carpet using an absorbent cloth. Then wet extract the remnants using Fabripowr or Fabripowr Plus.

### Acidic Rinse:

There are many benefits in using an Acid Rinse on carpets and upholstery. The removal of detergent residues, leaves the fibres feeling softer 'to touch'. Fabrinrinse utilises a unique blend of acid stable anionic surfactants to improve the wetting of carpet and upholstery fibres, neutralising detergent residues, stabilising colours and dyes preventing resoiling and fibre browning.

### Difficult Odours:

Fabrisan is a patented odour control spray designed for the removal of persistent odour problems. Fabrisan effectively removes odours from carpets that have been exposed to flood damage, organic matter, milk, urine and faeces, pets, smoke. Fabrisan is effective in removing mould and spores and eliminating urine odours. Fabrisan dries to a non-staining, non-toxic residue that can be easily vacuumed away.

## DETERGENTS

### Fabripowr Plus

Fabripowr Plus offers superior carpet cleaning performance without the use of alkaline boosters, effectively substituting for up to 5 different chemicals. Fabripowr Plus may be used as a carpet extraction detergent, carpet prespotter, carpet sanitiser, odour suppressor and deodouriser. Best used on blended and nylon fibre based carpets.

### Fabripowr

Fabripowr offers superior carpet. Fabripowr has been developed to work best on wool and natural fibre based carpets. Fabripowr may be used as a carpet extraction detergent, carpet prespotter, carpet sanitiser, odour suppressor and deodouriser.

### Fabrinrinse

Fabrinrinse utilises a unique blend of acid stable anionic surfactants to improve the wetting of carpet and upholstery fibres, neutralising detergent residues, stabilising colours and dyes preventing resoiling and fibre browning.

### Fabrisan

Fabrisan is a revolutionary carpet and upholstery deodouriser that contains Natural Australian Tea Tree Oil and will eliminate almost any odour. Fabrisan is effective in removing mould and spores and eliminating urine odours. Fabrisan dries to a non-staining, non-toxic residue that can be easily vacuumed away.

## DEFOAMER

### Bye Bye Foam

Bye Bye Foam is a silicone defoamer for use in carpet cleaning equipment. A cap full of Bye Bye Foam will completely eliminate any foaming problem in the recovery tank and will significantly have an effect on the speed and efficiency in carpet cleaning operation.
