

# BYE BYE FOAM

## SILICONE DEFOAMER

### BENEFITS:

- Concentrated defoamer
- Cost effective
- Instant defoaming
- Non-toxic and low irritant

BYE BYE FOAM has been formulated to reduce foam in the recovery tank of injection cleaning equipment. When foam is a problem, as little as a cap full of BYE BYE FOAM will completely eliminate any foaming problem. Eliminating the presence of any foam in the recovery tank can significantly effect the speed and efficiency of any carpet cleaning operation since the recovery tank can be filled completely with water before it has to be emptied. This also eliminates the danger of any foam making its way into the pumps.

The presence of excessive foaming often results from previous detergent residues being left in a carpet. Such residues may be due to previous bonnet cleaning operations or from the regular use of a high foaming domestic carpet spotting detergent.

### DIRECTIONS FOR USE:

As little as 1 cap per 20 litres of recovery tank capacity is required to completely eliminate all foaming problems. The rate of use may increase if the carpet being cleaned contains excessive carpet detergent residues.

Always place the defoamer in the recovery tank and not in the detergent tank. Silicone defoamers can contribute to sticky residues being left behind on the carpet if they are put into the detergent tank.

### NOTE:

Whiteley Industrial's carpet detergents Fabripowr and Fabripowr Plus contain a built in defoamer and will foam very little by themselves. When foaming problems are encountered it is generally because of the excessive detergent residues left behind in the carpet from previous cleaning operations.

**SAFETY DATA:**

For further information refer to the Material Safety Data Sheet (MSDS) located on the Whiteley Industrial website:  
[www.whiteley.com.au](http://www.whiteley.com.au)

**HEALTH AND SAFETY STATEMENT:**

There is no way of predicting an individual's response to cleaning or disinfecting products. All cleaning and disinfecting products have potential to cause skin and other irritation in susceptible individuals. Direct physical contact with the skin should be avoided. If irritation does occur when using this product or any other cleaning/disinfecting solution then the individual should be removed from direct contact with the solution until a satisfactory safe working environment for that individual is determined.

**ENVIRONMENTAL STATEMENT:**

Whiteley Industrial manufactures products that comply with Australian and International environmental policies. Whiteley Industrial aims to ensure that every product is 100% biodegradable, whilst achieving optimal performance and benefit to customers. All Whiteley Industrial products are supplied in 100% recyclable containers.

Whiteley Industrial and its staff are fully committed to ensuring that our Australian environment and those international environs in which our products are used are enhanced by the use of technology, and that these environments are preserved for the enjoyment of future generations.
