

DISHBRITE

MACHINE WASHING DETERGENT

BENEFITS:

- In-built scale inhibitor
- Works in hard or soft water
- Phosphate free
- Concentrated formulation

DISHBRITE is a strongly alkaline, non-foaming liquid compound intended for heavy duty mechanical washing. It can be used for utensil and dishwashing machines and is highly effective in removing soils and stains from stainless steel, ceramic and porcelain dishes and glassware. A highly buffered alkali reserve, good wetting and excellent rinsibility all contribute to quick, sure, regular cleaning. DISHBRITE contains a high level of sequestrant which ensures excellent performance in hard water areas and eliminates the possibility of scale formation within the washing machine.

MAJOR ADVANTAGES:

- **Guaranteed quality cleaning:** Use of only highly effective ingredients ensures consistent quality cleaning, free from rejects.
- **Consistent destaining:** High buffered alkali level ensures sustained cleaning and destaining. Excellent rinsibility gives the brightest possible results with less water spotting and streaks after heavy loads.
- **Better machine performance:** In-built protection mechanism to aide continuous trouble free machine operation with clean jets, less pump troubles and a dramatic reduction in machine scale.
- **Excellent rinsability:** Very little DISHBRITE is needed for excellent results. Combination of better detergency, removal of ingrained surface films, destaining and good rinsability ensures the best possible results everytime.

DIRECTIONS FOR USE:

Use 2 to 5 mL per litre of water. DISHBRITE may be hand fed or metered with electronically metered dispensing equipment. Concentration required will vary slightly depending on the type of machine load and dilution in the cleaning solution tank during normal washing cycles.

NOTE: Should machines require a rinsing compound DISHRINSE should be used. DISHRINSE is fed neat into rinse injectors where fitted to washing machines.

CAUTION

Do NOT use for manual dish washing. (For manual dish washing use Whiteley Industrial's APPLEBRITE dish washing liquid). WARNING - Corrosive. May produce severe burns. Attacks skin and eyes.

TECHNICAL ADVICE

For further information refer to Whiteley Industrial's How To Clean Kitchens information located in the Industrial Education section of the web-site, www.whiteley.com.au

SAFETY DATA

Wear suitable gloves and eye/face protection. For further information refer to the Material Safety Data Sheet (MSDS) located on the Whiteley Industrial web site: www.whiteley.com.au

HEALTH AND SAFETY STATEMENT

There is no way of predicting an individual's response to cleaning or disinfecting products. All cleaning and disinfecting products have potential to cause skin and other irritation in susceptible individuals. Direct physical contact with the skin should be avoided. If irritation does occur when using this product or any other cleaning/disinfecting solution then the individual should be removed from direct contact with the solution until a satisfactory safe working environment for that individual is determined.

ENVIRONMENTAL STATEMENT

Whiteley Industrial manufactures products that comply with Australian and International environmental policy. Whiteley Industrial aims to ensure that every product is 100% biodegradable, whilst achieving optimal performance and benefit to customers. All Whiteley Industrial products are supplied in 100% recyclable containers.

Whiteley Industrial and its staff are fully committed to ensuring that our Australian environment and those international environs in which our products are used are enhanced by the use of technology, and that these environments are preserved for the enjoyment of future generations.
