

REJUVEN8

FLOOR MAINTAINER

BENEFITS:

- Enhances gloss levels
- Increases durability
- Fast drying time
- Reduces the appearance of scuffs

REJUVEN8 is a neutral multi-purpose cleaner & maintainer designed to enhance the appearance of floor finishes. REJUVEN8 increases the durability of floor finishes and enhances gloss levels. REJUVEN8 effectively repairs scratches and reduces the appearance of scuffing - black heel marks, grounded in dirt and surface scratches.

Save time and money by using REJUVEN8 to clean and maintain floors with a simple to use application via an auto scrubber or mop and bucket. Using REJUVEN8 as directed extends the time between recoating with floor finishes. REJUVEN8 is designed to be used in conjunction with Tempo HD (or Citron neutral detergent) in a weekly maintenance schedule. REJUVEN8 should be used twice weekly to restore and rejuvenate sealed floors.

DIRECTIONS FOR USE:

REJUVEN8 can be used to clean and improve the appearance of many types of unsealed floors. It will help to reduce black marks and facilitate their easy removal.

REJUVEN8 should be used 2-3 times per week on commercial floors and as required in residential premises (once a month may be sufficient depending on foot traffic). REJUVEN8 can be used in standard AutoScrubbers or with a mop and bucket.

Dilute REJUVEN8 with water for the following applications:

Autoscrubber 17mL/L or 1 Litre/60L tank

Mop & Bucket 17mL/L (170mL per 10 Litre bucket)

Note: REJUVEN8 is not suitable for use as a spray buff. Always test products in a small, discrete area before large scale application.

Rejuven8 - July 2014, 1

Maintenance schedule for a sealed floor:

Daily: Sweep floor

Alternate Days:

> (4-5 days/week) Mop or scrub floor with Tempo HD & then buff.

> (2-3 days/week) Mop or scrub floor with Rejuven8 and then buff. This provides extra wear and durability to the floor finish while also increasing slip resistance.

Yellow floors are typically an indication that you may be either using too much maintainer, or the polish is getting old and worn, especially in areas of high traffic. It is suggested that you either wash off the old maintainer, or strip and reseat to get the best result from your floors.

SAFETY DATA:

For further information refer to the Material Safety Data Sheet (MSDS) located on the Whiteley Industrial website: www.whiteley.com.au

HEALTH AND SAFETY STATEMENT:

There is no way of predicting an individual's response to cleaning or disinfecting products. All cleaning and disinfecting products have potential to cause skin and other irritation in susceptible individuals. Direct physical contact with the skin should be avoided. If irritation does occur when using this product or any other cleaning/disinfecting solution then the individual should be removed from direct contact with the solution until a satisfactory safe working environment for that individual is determined.

ENVIRONMENTAL STATEMENT:

Whiteley Industrial manufactures products that comply with Australian and International environmental policies. Whiteley Industrial aims to ensure that every product is 100% biodegradable, whilst achieving optimal performance and benefit to customers. All Whiteley Industrial products are supplied in 100% recyclable containers.

Whiteley Industrial and its staff are fully committed to ensuring that our Australian environment and those international environs in which our products are used are enhanced by the use of technology, and that these environments are preserved for the enjoyment of future generations.
